A BRIEF HISTORY of

# REX LUMBER

After years spent handling, grading, sawing, and selling hardwoods in saw-mills, Paul Forester Jr. founded the Rex Lumber Company in 1946 at a single rail siding in Somerville, Massachusetts. His years of experience had taught him that creating a successful business would require a commitment to customers, investing in employees' futures, and actively participating in supporting the general hardwood industry. Following these basic tenets, Rex Lumber Company has evolved into a full service wholesale distribution lumber yard that provides not only rough lumber but a full range of quality services including ripping, planing, gluing, precision cut-to-length, custom moulding, end-matching, dentil and embossing, priming, and finishing, while always maintaining the highest standards of quality and commitment to our customers' needs.

From that humble rail siding in Somerville, Rex Lumber Company has been able to expand and innovate, providing opportunities for employees and additional services for our customers. In 1951 a yard with custom milling capabilities was opened in South Windsor CT. A move to Cambridge in 1952 allowed us to control the quality of our kiln drying. Our New Jersey location began operation in 1971, with kilns. The need for space forced a move once again from Cambridge to Acton MA in 1980. Following a steady plan of growth, Rex opened our yard in Doswell VA in 1986. Our fleet of over 30 company owned trucks allows us to meet the delivery needs of our customers.

Rex Lumber Company was built on the enthusiasm of our employees and the quality of our work. Rex Lumber now employs over 325 people that are committed to the key principle of providing what our customers need. Our team of buyers travel the United States and the world, securing our current offerings and identifying new species that will fit your needs. Our salespeople, most of whom hold wood technology degrees, have extensive millwork training and average 17 years with the company. Our years of experience have taught us what it takes to produce custom millwork for even the most demanding customers. We take pride in our quality and integrity and look forward to expanding our locations and list of offerings.

## VALUE-ADDED CAPABILITIES

At Rex Lumber Company, we specialize in custom millwork. Regardless of whether you supply us with an existing sample, a CAD drawing, a sketch you designed, or a print from a catalog, we have the state of the art equipment to match it perfectly. In addition to producing high quality millwork, we can re-manufacture your stock, rough or milled, to your specifications. We take great pride in servicing our customers with the quality they expect, from rough boards to finished mouldings. These capabilities make Rex Lumber the number one supplier for virtually all of your millwork needs.

---

### AMONG THE SERVICES WE PROUDLY OFFER

CAD Drawings	Cabinet Planing
Computerized Cut-to-length	Gang Ripping
Custom Mouldings	Straight Line Ripping
End-Matching	Thin Cut Resawing
Profile Sanding	Plinth Blocks
Flat Belt Sanding	Rosettes
Priming – Interior & Exterior	Embossed and Dentil Mouldings
Finishing	Flooring
Custom Glue-up –Interior & Exterior	Decking
Resawing	MDF and PVC Custom Profiles

---

## SUSTAINABILITY

In choosing Rex Lumber Company as your supplier, you get more than our quality lumber and millwork. You also share in our commitment to renewable resources and responsible forest stewardship.

While using solid hardwood lumber is an inherently Green choice, we also recognize that non-profit certification is important for maintaining the confidence of the public in today's lumber industry. Rex Lumber Company sources from mills that ascribe to one or more of the following systems: Forest Stewardship Council® (FSC®), Sustainable Forestry Initiative (SFI), American Tree Farm, Canadian Standards Association (CSA), and Programme for the Endorsement of Forest Certification (PEFC). As more certification methods are developed, Rex Lumber Company will evaluate them and incorporate them as necessary and advisable.

Rex Lumber Company was a pioneer in developing certified tropical species, including Genuine Mahogany and Spanish Cedar from Central America in the late 1990's. We identified countries with FSC® Certified forests, located forest stakeholders (generally local communities), funded them and trained the communities in harvesting techniques. Our model paralleled the work of USAID and helped develop local economies while preserving the sustainability of the forest. Our proven track record and continued involvement has allowed us to source the majority of available certified Mahogany and Spanish Cedar from Central America. Rex Lumber Company actively supports and abides by the principles of the Convention on International Trade of Endangered Species (CITES); a multi-national government-sponsored group that issues regulation to ensure the survival of a species.

We realize the importance of Green building standards designed to produce more efficient, low impact construction. Our products can be used in structures seeking certification by LEEDs, Green Globe, and other initiatives.

At Rex Lumber Company, we understand how important our natural resources are and the vital role that our forests play in everyday lives. The future is linked to the actions and choices we, as a planet, make today. Join us in wisely managing our most precious renewable resource, trees and timber products, by making informed choices for your lumber needs.

The mark of  
responsible forestry

Rex Lumber Company is a proud supplier of FSC® Certified wood products since 2001.

Most of the species and mouldings we sell are available using FSC® Certified Stock.

## CUSTOM PRIMING & FINISHING

At the Rex Lumber Company we are able to provide custom sealing, priming, staining and top coat finishes to almost all types of mouldings using our vacuum coat primers or spray finishing line. Many expert finishers recommend that the best time to apply primer or finish to wood is immediately after machining when it is clean and dry, in a temperature and humidity controlled environment.

**Like all of our other value-added operations, we work to your specifications to meet your needs.**

We will work with you to achieve your customers' needs, whether it be single pass basic primer in our vacuum coaters, a multi-step high-end Catalyzed Lacquer, or anything in-between.

**All mouldings used in high-end applications should be sanded prior to finishing.**

With our flat panel sander and/or nine head profile sander we sand the moulding to remove knife marks prior to applying finish. These machines are also used to buff/scuff the mouldings in between coats of a multi-step finish.

**While we provide custom finishing, the finish on the first and last piece of any given run will be consistent.**

Anywhere from one to six spray heads are used to apply the finish on up to three sides of the moulding in a single pass. The spray pattern, location and number of spray heads used vary depending on the moulding. The fact that the spray heads are in fixed locations means that the coverage, coating thickness, and spray pattern will remain consistent over the entire run.

**We can spray almost any type of finish available.**

Our current catalog of finishes includes both water and solvent based (oil/alkyd based) finishes for both interior and exterior applications. The types of finishes we can apply include, but are not limited to: primers, sealers, stains, dyes, bleaching oils, pre & post catalyzed lacquers (both clear and tinted), paints, and fire retardant coatings.

**We can match other components.**

If you provide us with your finishing specifications, including all stain and topcoats, we will be able to use the same finish as any other components produced for the job.

**Advantages of letting us apply finish verses doing it in your shop:**

- Applied using state-of-the art calibrated equipment.
- Our operators are well trained on equipment operation and product use.
- Consistent coating thickness.
- Applied in temperature and humidity controlled environment.
- Applied to freshly machined wood surface at proper feed/coverage rates.
- Identified costs and reduced labor in shop or at jobsite.
- No VOC's at the jobsite.

ASSOCIATIONS & AFFILIATIONS

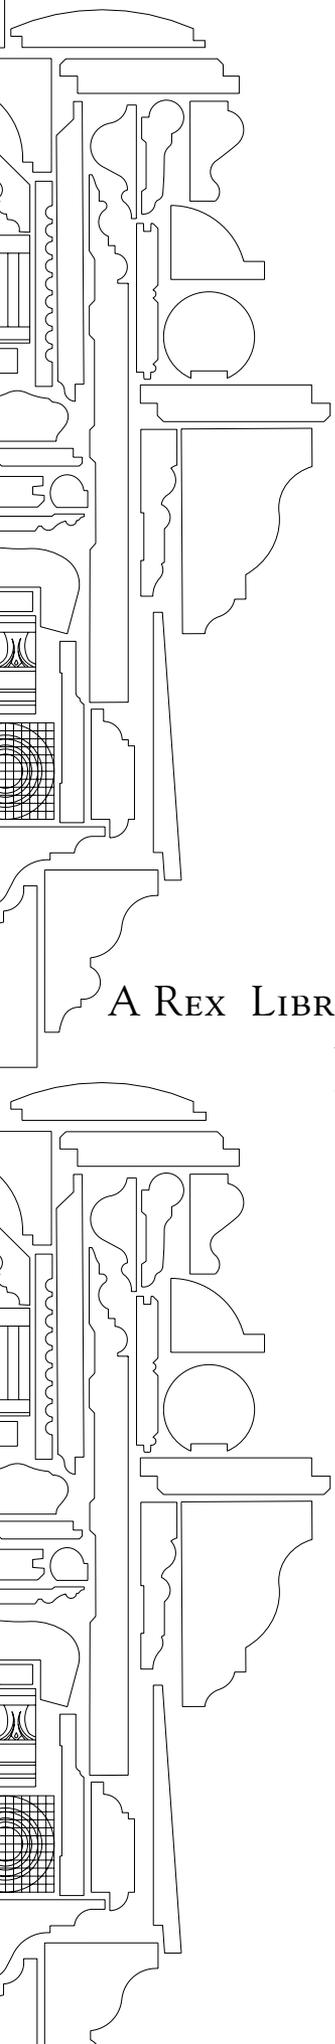

Rex Lumber Company is an active and proud member of America's leading lumber associations and is recognized by international certification bodies including the Forest Stewardship Council® (FSC®).

PANELING / WAINSCOT

If architecture had nothing to do with **art**,  
it would be astonishingly easy to  
**build houses**,  
but the architect's task -his most difficult task,  
is always that of **selecting**.

FLOORING

Designs of a purely arbitrary nature  
cannot be expected to last long

g

.

## PREMIUM FLOORING by REX LUMBER

Custom flooring is a Rex specialty and we are proud to offer the highest quality custom hardwood plank flooring available anywhere. We can manufacture flooring from any of our more than thirty-five domestic and imported species in stock or we can special-order virtually any species upon request.

### Custom Feature Strips & Matching Mouldings

Custom feature strips to accent your floor are available in Nogal, American Walnut, Mahogany, Maple, and any other species. Rex manufactures a complete line of mouldings to complete the custom flooring project including base, shoe, reducers, treads, thresholds, and more in the shape and species of your choice.

### Variety of Species and Specifications

Lengths up to 16' (subject to availability by species), and widths available up to 11-1/2" as tongue and groove. Wider widths available as square edge.

### End Matching

End matching is available for widths up to 9-1/4".

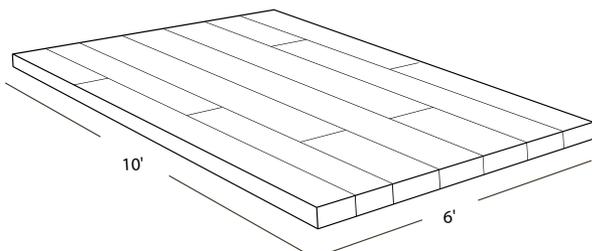

### Several Cut Options

For most species, planks can be Flat (Plain Sawn), Quarter Sawn, or Rift Sawn.

### Lumber Options for Green Designs

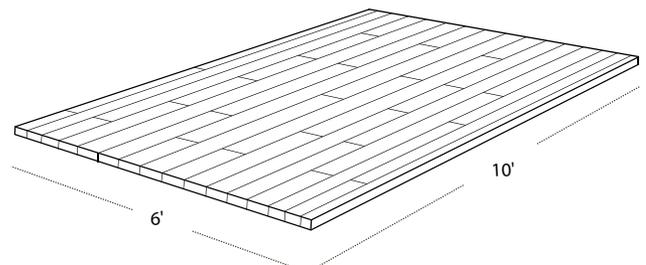

FSC®-Certified, reclaimed, and antique lumber is available for environmentally conscious jobs.

## CUSTOM WIDE LONG PLANK FLOORING vs. STRIP FLOORING

### Superior Wide Plank Flooring

A beautiful choice that adds character, warmth, and elegance to any space. Re-finishable and long-lasting, wide long plank flooring has proven its place on a short list of natural premium American flooring options.

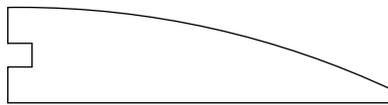

### Typical Hardwood Strip Flooring

Standard strip flooring can look manufactured, and prefinished options result in numerous uneven dips between strips that can trap dirt.

## STAIR PARTS b y R E X L U M B E R

At Rex Lumber Company, we understand stairways and have extensive experience working with professional stair builders. From standard box stairs to the world's most elegant curved stairs, Rex Lumber is your best source for the finest materials and parts.

### Rails

Both stock and custom railings are available, and in any shape and species. Please refer to our Handrail section.

### Stringers

Long and wide stringer and skirtboard stock (up to 20' long in some species). Custom gluing available when required. Thin resawn skins are available for forming curved stringers.

### Treads

Solid or glued, color-matched. Available custom made in virtually any species to match your flooring. High quality glued red and white oak treads in stock.

### Risers

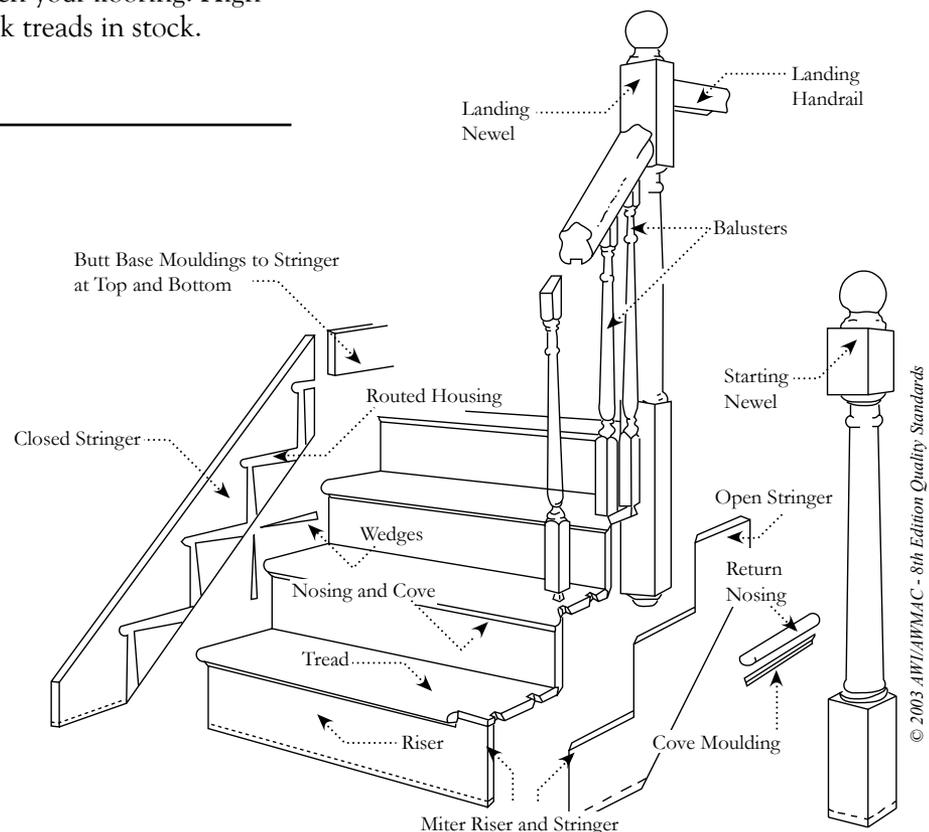

Custom sizes and species available. Random length, cut to length, and/or pre-primed.

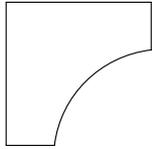

### Associated Mouldings

Including: nosing, landing tread, cove, etc.

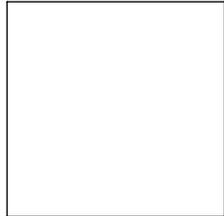

### Raw Materials

We offer Southern Yellow Pine: as rough, S4S, and bullnosed. Ponderosa Pine and our extensive inventory of premium hardwoods.
